

Concluding Remarks Video Transcript, March, 2021

MC:

Well hello, hello, hello, everybody. It's Mike Ciarciello and welcome to our conclusion video. I want to first off, start congratulating, Dave Phillischer, who is actually the founder of the Cosmo e-Brailer and of course Mike D'Abate, who is actually, doing a lot of the video footage and a lot of the editing for these tutorials that we brought to you today, in our series.

One of the things I want to get out of the way, you know, I realized that during these hard times and during these times that we're going through right now with the pandemic and all, you know, the videos have been developed to the best of our abilities and I can assure you that things will develop along the way as we go along. But we wanted to bring to you a series that lets you guys learn how to use the Cosmo Brailer in a simple way and something that will allow you guys to be able to learn the unit so you can teach it to your children or students and on and on and on. So we really wanted to bring to you a series that would encompass, you know, learning how to use the unit as easy as possible.

And of course along the way you know, we're always here to make sure that your needs are are met in whatever way. So this is why we have the support system where you can always contact us and if of course there's, you know, trouble with the unit you can always contact Dave Pillischer, if things are not working to the best that they can work.

So I wanted to take the time to conclude and say it was an amazing experience and of course there's more to come along the way in the future. But I just wanted to congratulate all of you for getting to this point in the Cosmo Brailer and I hope you've enjoyed the tutorials so far and the videos and the films that we put out for you. Again we always remain open for any suggestions or feedback and it was just a pleasure to do this and I look forward to doing more stuff, more tutorials in the advanced section in the future. So with that, I want to congratulate you guys once again for getting this far in the first section and I look forward to seeing you guys very very soon.
